Projects

Note – Source code can be found [here](#) and a brief description can be found on my [personal site](#)

- **FrontendMentor Challenge** – A responsive dashboard site utilizes SASS/SCSS for styling, offers Dark/Light mode toggles, and retains user color mode preferences via local storage.
- **OpenGPT-3 landing page** – A modern UI/UX landing page for OpenGPT-3 made with React JS.
- **Gericht Restaurant** – A Restaurant landing page. Implemented a figma design using React.
- **Covid-19 tracker** – A React-based application adept at retrieving data from external APIs and elegantly presenting it using graphs
- **iNoteBook** – A Note taking app built using MERN stack with Authentication implemented.
- **Florange Fashions** – A full-fledged E-commerce website which have all features of a modern ecommerce site just like flipkart and amazon.

Skills

- **Frameworks** – React, Next JS, Express, Astro, Flask, Tailwind CSS
- **Languages** – Java, Javascript, Typescript, Golang, Python
- **Miscellaneous** – Linux, Nginx, AWS, Docker, Kubernetes, HTML, CSS, YAML
